

RESECTION RACCOON CHALLENGE

Team: _____

Day: _____

Equipment: student map, compass/protractor, ruler, pencil, and radio.

MISSION: Calculate back azimuths, draw from the named schools, and call ZULU MAIN only when your team has a defensible intersection.

Radio report format

"ZULU MAIN, this is [TEAM]. We have a location for [CALL SIGN]."

"The location is [DESCRIBE/POINT]. Our fix used [SCHOOL 1] and [SCHOOL 2]. Over."

1 - LOCATE YOUR TEAM

You can see Langley High School at 331 degrees and Brashear High School at 125 degrees.

Plot and label START. Call ZULU MAIN and report your location.

Back azimuth from Langley: _____ Back azimuth from Brashear: _____

2 - RESECTION RACCOON 1

Distress call: "I can see Prospect School at 111 degrees and St. Margaret School at 231 degrees."

Plot and label RR1. Call ZULU MAIN and report the location.

Back azimuth from Prospect: _____ Back azimuth from St. Margaret: _____

3 - RESECTION RACCOON 2

Distress call: "St. Margaret School is WSW of me. I can see Brashear High School at 110 degrees."

Plot and label RR2. Call ZULU MAIN and report the location.

WSW azimuth: _____ Required drawing directions/back azimuths: _____

RESECTION RACCOON CHALLENGE

Team: _____

Day: _____

4 - RESECTION RACCOON 3

Distress call: "Brashear High School is NE of me. St. Martin School is SSE of me."

Plot and label RR3. Call ZULU MAIN and report the location.

NE azimuth: _____ SSE azimuth: _____ Drawing directions/back azimuths: _____

5 - INTERVIEW RESECTION RACCOON 4

Call RR4. Ask for the minimum information needed to locate them. Record only what you request.

School/landmark Reported azimuth Back azimuth

Plot and label RR4. Call ZULU MAIN and report the location.

6 - INTERVIEW RESECTION RACCOON 5

Call RR5. Ask for the minimum information needed. RR5 uses cardinal, intercardinal, or secondary-intercardinal directions rather than measured degrees.

School/landmark Reported direction Azimuth/back azimuth

Plot and label RR5. Call ZULU MAIN and report the location.
